**Re: AHERA ANNUAL NOTIFICATION**

The Asbestos Hazard Emergency Response Act (AHERA) of October 1987 has required that local education agencies have all buildings inspected for asbestos containing materials and that an annual notice inform faculty, staff, and the community of the current status.

During the previous year the following actions with regards to asbestos in the building have occurred:

1. The 6-month annual inspection occurred in January 2019.
2. The 3 year inspection is scheduled for July of 2019

All removal work was done in accordance with NJ Department of Health Sub-Chapter 8 regulations.

Pursuant to AHERA, the Rumson Public Schools retained the firm of Walls Environmental to inspect, assess, and recommend response actions as part of the Asbestos Management Plan for the District. The firm will also provide monitoring, design response actions, and air sampling when required, as provided for in the act.

Please be advised the Management Plan is available for review during normal working hours in the office of the James P. O'Brien, Supervisor of Buildings and Grounds. You may contact the office at 732-842-3293.
