Dear Parents/Guardians of Rumson & Fair Haven Eighth Grade Students,

Welcome to RFH! There has never been a better time to join the Rumson-Fair Haven Regional High School community. **Whether you plan on attending RFH or another high school, there are some important things we need for you to do now.**

Please note that all grade eight students who live in Rumson or Fair Haven must register with RFH, even if you are considering attending a different high school. Please use the Pre-Registration link below. State regulations require that our school district provides certain support (e.g., textbooks, transportation, security aid, etc.) to those schools. Students who attend a high school other than Rumson-Fair Haven Regional High School will need to provide proof of residency annually.

[Link to Pre-Registration Form](#) (Please complete even if you are not planning on attending RFH.) It is imperative that you create a *PowerSchool* account. Directions for creating a *PowerSchool* account will be sent to you once you've completed this Pre-Registration form. Additional documentation will be needed, including proof of residency. Videos and handouts to help you through this process can be found at www.rumsonfairhaven.org

We invite you to attend the Pre-Registration meeting on Tuesday, January 14, 2020 at 6:45 PM where you will have the opportunity to hear from our supervisors and prepare for your family's meeting with RFH counselors later this month. All grade eight students and their families are encouraged to meet with RFH counselors, especially if you are undecided about your high school at this time. You will then be able to register as an RFH student.

We are Ready for the Future at RFH. In the next few weeks, you will learn about all that RFH has to offer. You will find that we have expanded our course offerings to include *Introduction to Computer Science, Dynamic Public Speaking, Forensic Science* and *2-D Art*. We've updated our third floor with exciting learning spaces and a state of the art World Language Lab. During the summer, we are renovating science classrooms, creating a computer science coding room, and beginning construction of a brand new Woods Technology Lab. During your child's time at RFH, students will have access to more than 24 AP courses and Dual Enrollment options. High School is an exciting time to take risks and learn about what interests your children. We have more than 25 athletic teams and 50 clubs and organizations. Our faculty, staff and current students are looking forward to welcoming the RFH Class of 2024 to our school community!
