

Keyboarding

Regardless of the subject area, most next generation assessments require students to **type many of their responses**. Students need to be **proficient with keyboarding skills** so they will not be slowed down considerably by their own typing speed. Otherwise the assessment may not be a true measure of their content knowledge, but instead be negatively impacted by their typing proficiency.

Below are interactive, tech-enhanced online resources to help students practice the keyboarding skills they will need for next generation assessments.

If you know of other appropriate resources, [please submit them through our form here](#). Submissions will be reviewed and added to the collection.

Keyboarding Lessons

- [Link](#) - TypingWeb - Free online typing tutor & keyboarding tutorial for typists of all skill levels. TypingWeb includes entertaining typing games, typing tests, and free official typing certification.
